

# WAX FILLER

## SPECIFICATION

### WAX FILLER

#### BENEFITS :

- Easy and convenient to use;
- Fills the defects in a quick and reliable way;
- Protects defects from the moisture ingress;
- Contains lightproof pigments

#### INGREDIENTS :

Wax, pigments

Meets the manufacturer's technological regulations

### DESCRIPTION AND APPLICATION :

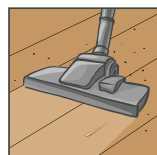

The wax filler is an eco-safe pigmented wax composition with functional additives that is designed to restore all types of wooden surfaces and elements. To be used indoors.

Wax filler is designed to quickly remove any mechanical damage and other small surface defects that appear during manufacturing, storage and transportation of flooring, as well as for renovation of small knots on wooden planks.

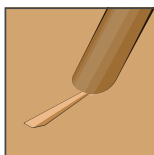

Wax fillers may be used on lacquer, enamel, oil or wax covered surfaces, as well as on PVC-finished surfaces.

### APPLICATION :

**Important!** It is recommended to test the wax filler on restored surface sample to define the color of the surface.

1. Clean the floor from sand, dust and litter using a vacuum-cleaner.

2. To remove defects sweep the wax filler over them several times.

3. Burnish the surface with rags removing the wax filler excess.

### STORAGE AND TRANSPORTATION CONDITIONS :

Keep at temperature from 5°C to 25°C. Keep away from direct sunlight and frost.

### SAFETY REQUIREMENTS :

For intended use only. Keep out of the reach of children.
