

WOODEN ONLAY

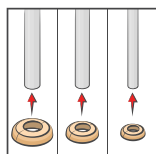

SPECIFICATION

	WOODEN ONLAY
	BENEFITS : <ul style="list-style-type: none"> • Allows to hide expansion gaps; • Easy to fix; • Available in three standard pipe diameters; • Can be produced in any floor finishing; • Eco-friendly material
	INGREDIENTS : Beech
	Meets the requirements of Manufacturer's technical regulations

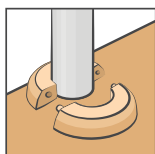

DESCRIPTION AND APPLICATION :

Wooden onlay is designed to hide expansion gaps between pipes of radiators (batteries) and flooring (hardwood flooring, laminate flooring, etc.). The onlay is available in three standard pipes sizes used in heating systems.

APPLICATION :

1. Select the onlay size that corresponds to the diameter of the radiator pipe.

2. After hardwood flooring installation fix the onlay at the pipe output from the floor and fasten two parts of the onlay together until click.

3. If it's necessary to tint the onlay, it is recommended to use Coswick repair and renovation products.

SAFETY REQUIREMENTS :

Use only as directed. Keep out of children reach.

DISPOSAL :

After using dispose of onlay and empty package as domestic garbage.
